

Paragraph 60. Technical Standards. Harmonization of standardssimilar to acceptance of CISPR22 for FCC Part 15 digital devices should be considered for Wireless devices. WiFi and Bluetooth device testing for global markets is a dual test, one for test and report for FCC 15.247 and another for ETSI EN 300 328. Both standards, though similar, are not interchangeable under FCC regulations. An effort from the FCC to harmonize the acceptance of some if not all ETSI-EN standards would speed and reduce costs for manufacturers of new products into the marketplace.
